

9 April 1962

MEMORANDUM FOR: Director, NPIC *GCL*  
THROUGH: Executive Director, NPIC *ck*  
SUBJECT: Publications Division Report for March 1962

1. Thirty-two publications were produced in the division in March, including 17 detailed or specific reports, 2 technical publications, one mission coverage index, 2 mission coverage plots, 3 OAKs, 2 immediate photographic interpretation reports, 2 situation summaries, and 3 listings. One of the detailed reports was published for GMAIC, the other for SIC. All other publications were the products of NPIC analysis; no departmental reports were handled in March.

2. The total page count for the items listed in paragraph one was 668 pages, an increase of 39 percent over the February production of 480 pages and an increase of 21 percent over the March 1961 production. Slightly over 50 percent of the 668 pages was contained in the GMAIC and SIC reports.

3. The 32 publications released in March contained 116 annotated photos, 98 maps, 119 line drawings, and 6 perspectives. In addition to the illustrations appearing in publications, the division produced 71 briefing boards, 15 forms and charts, one perspective, one mosaic, 6 stereopairs, 4 vu-graphs, 35 covers, 5 grids and templates, and completed 9 miscellaneous graphic jobs.

4. A large number of the graphics appearing in publications was due to publication of the GMAIC and SIC reports; the increased number of briefing boards results from the current practice of making two sets of boards instead of one for each mission. In any event, the number of graphic jobs has shot up enormously this past month and will, of course, become even greater with the production of original vu-graphs and an increased rate of source inputs.
